# **Barts BioResource**

## **January 2018 Newsletter**

# Information

*Bart's BioResource (BBR) news and views* is a monthly newsletter that showcases our research recruitment for the different layers of consent (data, biosamples, tissue donation  $\pm$  future contact) and our key locations where currently consenting takes place.

The *BBR* newsletter shares information on new sub project developments and also provides patient and staff feedbacks relevant to our research project.

The *BBR* can often support disease specific research projects and questions. If you would like to find out more or have any comments on this newsletter, please contact [maudrian.burton@bartshealth.nhs.uk](mailto:maudrian.burton@bartshealth.nhs.uk)

Access to the project can be obtained by completing the below link

# Patient Feedback

Barts Health  
NHS Trust

“ I feel happy that I can support a research study, I have wanted to participate in research but did not want to travel back to the hospital. Being able to opt out of future contact was ideal.”

Anonymous participant

“ The consent form mentions contacting my GP, the NHS and the Office of National Statistics. This was not in the Patient Information Sheet – I would have preferred that this was explained in the PIS.”

Anonymous patient

# Cumulative Recruitment

**Barts Health**  
NHS Trust

## Barts BioResource cumulative recruitment

Total consent N = 15331; Total re-consent N = 787

# Proportion of recruitment by researcher

Recruiter

# Recruitment to sub-studies

Number of patients recruited into studies

# Recruitment to each stratum

Type of consent

# Proportion of biosamples collected

Completed blood collection out of all patients consented for blood

Completed tissue collection out of all patients consented for tissue
